(54) COMMUNICATION TERMINAL, COMMUNICATION SYSTEM AND CALL- IN NOTICING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a communication terminal for noticing a call-in to a called user by use of multimedia data for noticing the call-in set by a caller; a communication system; and a call-in noticing method.

SOLUTION: A communication terminal notices a call-in based on a call setting message for setting a call of a communication to be received when calling in, and comprises a reception part for receiving a call setting message having multimedia data containing at least one of call-in noticing image data and voice data when calling in; a control part for extracting the multimedia data from the received call setting message; and an output part for noticing the call-in by use of the multimedia data.
